# StoneGate Appliances

---

StoneGate High Availability Firewall and Multi-Link VPN Engine is available as pre-installed, tested appliances. For more information about different appliance models, please consult our Web site at [http://www.stonesoft.com/en/products\\_and\\_solutions/supported\\_platforms/fw\\_vpn\\_appliances/index.html](http://www.stonesoft.com/en/products_and_solutions/supported_platforms/fw_vpn_appliances/index.html).

## Certified Intel Platforms

---

Stonesoft has certified specific Intel-based platforms for the StoneGate Firewall/VPN gateway. The updated list of certified platforms can be found at [http://www.stonesoft.com/en/products\\_and\\_solutions/supported\\_platforms/intel\\_servers/](http://www.stonesoft.com/en/products_and_solutions/supported_platforms/intel_servers/).

## Other Intel Platforms

---

We strongly recommend using a preinstalled StoneGate appliance or a certified hardware as the hardware solution for new StoneGate Firewall/VPN installations. If it is not possible to use a certified platform, the StoneGate Firewall/VPN gateway can also run on standard Intel-based hardware that satisfies the StoneGate hardware requirements.

### Basic Hardware Requirements

- Intel® Pentium III® /4® /Xeon® based hardware
- IDE hard disk (IDE RAID controllers are not supported) and CD-ROM drive
- 128 MB RAM minimum (256 MB if SIP or HTTP Inspection is used)
- One or more network interfaces
- VGA compatible display and keyboard

### Network Interface Cards

StoneGate Firewall and VPN Engine supports Ethernet, Fast Ethernet, and Gigabit Ethernet interfaces on the Intel platform. We strongly recommend using certified network interface cards. Certification has been performed by Stonesoft. The list of certified network interfaces can be found at [http://www.stonesoft.com/en/products\\_and\\_solutions/supported\\_platforms/intel\\_servers/certified\\_nics.html](http://www.stonesoft.com/en/products_and_solutions/supported_platforms/intel_servers/certified_nics.html).
